EDUCATION

SHANTI BUSINESS SCHOOL
Degree: BCA – Computer Applications
2024 – 2027 | Expected: 2027
CGPA: 9.12

SATYAM VIDHYALAYA
12th – 71% (2024)

SATYAM VIDHYALAYA
10th – 70% (2022)

SKILLS

Strong: Python 3.11, FastAPI, SQL (PostgreSQL, SQLite), Pandas, NumPy, Git & GitHub, AI/ML Fundamentals, Data Analytics

Intermediate: GraphRAG, Neo4j, pgvector, OpenCV, React Native (Expo), Next.js 14, TypeScript, REST APIs, Docker Compose, Pytest, Android SDK

Beginner: Ollama, LangChain, Deep Learning, Neural Networks, Cloud Technologies, Java

ACHIEVEMENTS

- 2nd Position – SIH 2026 Internal Hackathon (Team CyberForge, Team Leader, 58 Marks)
- 6th Position – Silver Rock Mini Hackathon (Team of 4)
- Selected – Inter-College Technical Project
- Participated – Smart India Hackathon (SIH) 2025

CERTIFICATIONS

- Oracle – Agentic AI Foundations Associate
- Google – Introduction to Generative AI
- Infosys Springboard – Data Visualization with Tableau
- Akash Technolabs – Android App Development Using Java
- Unlox – Generative AI
- Unlox – UI/UX Internship

EXPERIENCE

Student Developer / Project Developer
Shanti Business School | 2024 – Present
Working on software development, AI/ML, data analytics, mobile applications, and full-stack academic projects.

UI/UX Intern
Unlox
Worked on UI/UX-related design and development activities as part of an internship.

EXTRACURRICULARS

- Hackathon Participation – SIH 2026, Silver Rock Mini Hackathon, and other technical competitions
- Team Leadership – led Team CyberForge to 2nd position at SIH 2026 Internal Hackathon
- Inter-College Projects – selected for an inter-college technical project

PROJECTS

AI Smart Attendance System **2026**
Smart India Hackathon (SIH) 2026 – Internal Hackathon | 2nd Position, Team CyberForge
Role: Team Leader (6-Member Team)
Tech Stack: Python, FastAPI, OpenCV, React Native (Expo), SQLite, SQLAlchemy, Docker Compose, Pytest, Haversine GPS, JWT
An AI-powered employee attendance system combining GPS geofencing and live face verification to prevent unauthorized check-ins. Includes an employee mobile app, admin dashboard, attendance history, leave management, and reporting.

Enterprise Knowledge Graph RAG Copilot 2026
Production-Grade AI Platform | Completed
Role: Lead Developer
Tech Stack: Python, FastAPI, Neo4j, PostgreSQL (pgvector), Ollama, Next.js 14, RRF
Enterprise-grade GraphRAG copilot combining dense vector embeddings with Neo4j multi-hop graph reasoning, real-time SSE streaming, and Ollama local private LLM inference with zero-hallucination citations.

MATHSPRINT **2025**
Academic Project | Completed
Role: Developer
Tech Stack: TypeScript, Firebase, Firestore, Realtime Database, REST API
A real-time math quiz platform where students solve 10 questions within a 120-second timer, with a live teacher dashboard tracking accuracy, class rank, best strike, and performance flags.

Mental Health Tracker (Android) **2025**
Personal / Academic Project
Role: Developer
Tech Stack: Android SDK, Java 8+, SQLite (Offline Storage), Material Design
A mental-health tracking Android application that lets users record and monitor wellbeing-related information over time.

Personal Portfolio Website **2024**
Personal Project
Role: Developer
Tech Stack: HTML, CSS, JavaScript
A personal portfolio website showcasing profile, skills, and project work.

90-Day Workforce Attendance Analytics 2026
Quantitative Data Analytics & EDA Case Study | Completed
Role: Data Analyst
Tech Stack: Python, Pandas, Seaborn, Matplotlib, Jupyter, Statistical Modeling
Exploratory data analysis modeling 3,550 employee punches over 90 days.
Discovered commute distance tardiness correlation (r = +0.67), Monday peak delays, and proposed evidence-based 15-minute flexible grace periods.

- Hackathon Organizer – organized a college-level hackathon, managing participants and execution
