EDUCATION

SHANTI BUSINESS SCHOOL
Degree: BCA – Computer Applications
2024 – 2027 | Expected: 2027
CGPA: 9.12

SATYAM VIDHYALAYA
12th – 71% (2024)

SATYAM VIDHYALAYA
10th – 70% (2022)

SKILLS

Strong: Python, HTML, CSS, JavaScript, MySQL, Git & GitHub, AI/ML Fundamentals, Data Analytics Fundamentals

Intermediate: FastAPI, Flask, Flutter / Dart, SQLAlchemy, REST APIs, Firebase, TypeScript, Face Recognition / Computer Vision, Geolocation & GPS, Android Development, Data Visualization

Beginner: React, Deep Learning, Neural Networks, Generative AI, Cloud Technologies, Java

ACHIEVEMENTS

- 2nd Position – SIH 2026 Internal Hackathon (Team CyberForge, Team Leader, 58 Marks)
- Participated – Silver Oak Mini Hackathon (Team of 4)
- Selected – Inter-College Technical Project
- Participated – Smart India Hackathon (SIH) 2025
- Participated – Hackbriven Hackathon

CERTIFICATIONS

- Oracle – Agentic AI Foundations Associate
- Google – Introduction to Generative AI
- Infosys Springboard – Data Visualization with Tableau
- Akash Technolabs – Android App Development Using Java
- Unlox – Generative AI
- Unlox – UI/UX Internship

EXPERIENCE

Student Developer / Project Developer
Shanti Business School | 2024 – Present
Working on software development, AI/ML, data analytics, mobile applications, and full-stack academic projects.

UI/UX Intern
Unlox
Worked on UI/UX-related design and development activities as part of an internship.

EXTRACURRICULARS

- Hackathon Participation – SIH 2026, Silver Oak, Hackbriven
- Team Leadership – led Team CyberForge to 2nd place at SIH 2026
- Inter-College Projects – selected for a technical project
- Hackathon Organizer – organized a college-level hackathon

PROJECTS

AI Smart Attendance System — 2026

Smart India Hackathon (SIH) 2026 – Internal Hackathon | 2nd Position, Team CyberForge
Role: Team Leader (6-Member Team)
Tech Stack: Flutter, Dart, Python, FastAPI, MySQL, SQLAlchemy, JWT, Face Recognition, GPS/Geofencing, REST API
An AI-powered employee attendance system combining GPS geofencing and live face verification to prevent unauthorized check-ins. Includes an employee mobile app, admin dashboard, attendance history, leave management, and reporting.

Qoneqt ContentOS – AI Video Generation System — 2026

Open-Source / Forked Project | Python
Role: Contributor
Tech Stack: Python, Multi-Agent AI, Scripting Engine, Video Rendering
An AI-powered vertical video generation operating system with a multi-agent scripting and rendering engine.

MATHSPRINT — 2026

Academic Project | Completed
Role: Developer
Tech Stack: TypeScript, Firebase, Firestore, Realtime Database, REST API
A real-time math quiz platform where students solve 10 questions within a 120-second timer, with a live teacher dashboard tracking accuracy, class rank, best strike, and performance flags.

Mental Health Tracker (Android) — 2025

Personal / Academic Project
Role: Developer
Tech Stack: Android, Java, HTML, Database/Backend
A mental-health tracking Android application that lets users record and monitor wellbeing-related information over time.

Personal Portfolio Website — 2026

Personal Project
Role: Developer
Tech Stack: HTML, CSS, JavaScript
A personal portfolio website showcasing profile, skills, and project work.

SnatchUp Website — 2025

Basic Web Development Project
Role: Sole Developer
Tech Stack: HTML, CSS, JavaScript
Independently developed the SnatchUp website using HTML, CSS and JavaScript, focusing on a clean, responsive interface with basic frontend interactivity and full individual ownership of development.
